

## MATHS REVISION

The Maths department have completed teaching the course and pupils will perform at their best if they revise the whole course. In order to access the highest grades, pupils need to combine different mathematical skills in to solve multi-step problems.

Thorough revision of all content is therefore necessary. A list of topics covered can be found here <https://www.ocr.org.uk/qualifications/gcse/mathematics-j560-from-2015/specification-at-a-glance/>

As a starting point, students should begin revising the elements of maths they did least well in at the mocks. This can be found in a letter sent by Mr Nall to parents in December 2020.'
